

● **Custom 2-piece Metal Gondola Lift-off Lid**

Specifications

- 2-piece steel design/2,500 lbs. per piece
- Standard and custom sizes available
- Comes complete with perimeter gasket
- Complete with lifting rings for easy handling
- Exterior surface features a durable anti-slip coating to secure footing during rigging activity

Equipment Features

- MHF Services developed lift-off metal lid
- Used successfully in operation for several years in interchange rail service
- AAR approved Holland Beak Lock automatically locks and releases, eliminating labor as is required to engage lock when used on fiberglass lids

Equipment Advantages

- Can be placed into regular train service without fear of damage due to coupling impacts
- Safer to handle in higher wind conditions than fiberglass lids
- Can be stored temporarily in staging area without fear of wind damage

Note

- The gondola railcar meets the US DOT requirement for a "General Design Package" per 49 CFR 173.410

Security & Safety

Security seal provided for each lid half, two per trip, to ensure against unauthorized access during transit. Seals provide an excellent barrier, and high-strength cable construction prevents tampering.
