

● **11-HW4896 — Five Yard Soft Sided Container System**

Specifications

- 5 cubic yard volume
- 10,000 lb. capacity
- Tare weight 48 lbs.
- Empty size 5 cubic foot
- Loaded size 8' L x 4' W x 4' H
- Fabric is woven and coated polypropylene

Package Handling

- Package can be transported by rail, flatbed truck, or dump truck/container/barge
- Package can be lifted by crane or forklift

Package Advantages

- Self-standing package, no lifting frame or loading apparatus required
- Disposable package eliminates decontamination
- Easy to handle, load and store (48 lbs. and 5 cubic feet when empty); minimal freight cost in and out
- A bulk package that is ideal for surgical remediation efforts and offers the shipper many shipping options
- Sift-proof certification meets a variety of contaminants, hazardous materials and waste products
- Optional 6 mil liner can then be used for asbestos waste containment

Stand-Alone Soft-Sided Materials Package

- Easy to use, self standing, no lifting or loading frames
- Handle with crane or forklift
- 49 CFR 171.8 “sift-proof packaging”
- Designed to replace roll-off usage
